Flutter

Kotlin

Jetpack Compose

Android

Firebase

Supabase

REST APIs

PROFESSIONAL SUMMARY

Android and Flutter Developer with 7 months of professional experience at Occaza Events Private Limited, progressing from a 3-month internship to a permanent Cross-Platform Application Developer role based on strong performance. Experienced in maintaining production Flutter applications, implementing features, resolving bugs, integrating REST APIs, and supporting backend deployments. Skilled in Flutter, Dart, Kotlin, MVVM, Firebase, Supabase, and Django, with a focus on building clean, reliable, and user-friendly mobile applications.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Kotlin, Android Development, Jetpack Compose, MVVM, Navigation Compose

Backend & Databases: Python, Django, REST APIs, Firebase, Supabase, MySQL, PostgreSQL, SQLite, Firestore, SQL

Integrations: Firebase Authentication, Supabase Auth, Razorpay Payment Gateway, MSG91 OTP Authentication, Google Analytics, DLT Templates

Tools & Platforms: Git, GitHub, Android Studio, VS Code, Railway, Cline, GitHub Copilot, OpenAI Codex

PROFESSIONAL EXPERIENCE

Cross-Platform Application Developer, Occaza Events Private Limited | Remote | Mar 2026 - Present

Internship: Mar 2026 - May 2026 | Promoted to Permanent Role: Jun 2026

- Completed a 3-month internship and earned promotion to a permanent role based on strong performance and delivery.
- Maintain Flutter applications for Android in production codebases and deliver release-ready improvements.
- Implemented features, fixed bugs, submitted pull requests, and collaborated with senior developers during code reviews.
- Deployed backend services on Railway and supported API workflows for mobile app features.

EDUCATION

Senior Secondary (10+2): UP Board

B.Tech in Computer Science and Engineering: Dr. A.P.J. Abdul Kalam Technical University, ABSS Institute of Technology, Meerut | 2022 - 2026 | CGPA: 7.5+/10

PROJECTS

Fixmate - Home Service Marketplace App | Flutter, Dart, Supabase, Python, Django, SQL

- Built a Flutter-based home/mechanic service marketplace where customers can book repair services and providers can publish services.
- Implemented email/password login with Supabase Auth and role switching so the same user can act as customer or service provider.
- Added customer direct booking, open service requests, provider profiles, service publishing, charges, area, experience, and availability management.
- Supported booking statuses, chat, ratings, app notifications, Supabase SQL tables with Row Level Security, and a Django backend with JSON API endpoints.

GitHub: github.com/samanshakya954899-cell/Fixmate

Emotion Detection App | Android, AI, Firebase Authentication

- Built an Android application that uses AI to detect and display human emotions in real time.
- Added user sign up and login functionality using Firebase Authentication.
- Analyzed facial expressions through AI and instantly displayed the detected emotion on screen with a simple, user-friendly interface.

CERTIFICATIONS

Artificial Intelligence Training: Training Basket | Sep 2024 - Oct 2024

Flutter Developer Internship Certificate: Occaza Events Private Limited | Mar 2026 - May 2026

ACHIEVEMENTS

- Built and deployed mobile applications with authentication, REST APIs, payment integration, and cloud deployment.
- Promoted to a permanent Cross-Platform Application Developer role after completing a 3-month internship at Occaza Events Private Limited.
- Used GitHub Copilot, OpenAI Codex, and Cline for AI-assisted development and productivity.
